

WHAT IS HUMAN RESOURCES?

Human resources management (HR) is a business process that focuses on recruiting, training, evaluating, and guiding the people who work in a company. Almost every area of an organization is impacted by the human resource function in some way.

Since human resources management is so broad, there are many different areas of career focus. HR professionals typically possess specific expertise in one or two areas, such as benefits, recruiting, or compensation.

For most organizations, agencies, and businesses, the human resources department is responsible for managing:

- Hiring and promotion
- Employee policies and procedures
- Job training and career development
- Benefits and wellness programs
- Disciplinary policies and actions
- Payroll coordination
- Employee concerns
- Layoffs and retirement
- Employee morale
