

Health and Safety Requirements for the CHW Program

Scottsdale Community College - 9000 E. Chaparral Rd, Scottsdale, AZ 85256

In order to join a program in the Healthcare Education department, there are several requirements you must meet. Maricopa Community Colleges requires all students to meet the placement requirements as set up by our program's most stringent clinical partner. We do this for ease of random placement.

These health and safety requirements must all be completed prior to taking the final course, IPH 275, in the CHW program.

Watch our video to learn more about the department's requirements or [review the individual requirements](#).
